1st Edition

Bringing Light, Hope & Solutions To An Uncertain World

FREE

Another Perspective

This is an invitation and opportunity to consider another point of view.

Do you feel confident you really know what is going on? Are you starting to question the Mainstream Media? Have you begun to lose trust in the Government? Do the steps being taken concern you more than the disease itself? You are not alone.

Many people are beginning to question the significant inconsistencies in what we are being told and many are very concerned about the speed with which severe and detrimental changes and restrictions are being imposed upon us. The impact of these changes have reached far and wide and deep into all areas of our lives:

The impact on our economy; our local trade; people's livelihoods; mental health; the disruption to our children's education and the constant fear-mongering about the fragility of our health and our security. Many are questioning whether the stress, suffering, and uncertainty caused by the Government's response to this "pandemic" is indeed more of a threat to our health,

Anti-Lockdown Freedom Protest London

way of life and well-being than the virus itself ever was.

This newspaper seeks to offer articles to give hope and support, sharing alternative perspectives that we can all explore. When we find the courage to actively ask real questions, we become more empowered and trust our own minds and then recognise that it is our duty to seek the truth, especially when it is clear we are being badly misled and when

there is so very much at stake.

We naturally all need to take responsibility for our own health and well-being and also take responsibility for our wider contribution to society. It is time to reflect on what is unfolding and ask ourselves if we really want our society to go this way and what we can do to stop it, if the answer is no.

This is also a call to all independently-minded thinkers

to step forward, to come together, and to stand united in common understanding. To share a mutual goal, which is to halt this catastrophic decline in our culture, community and livelihoods. There must be a stop to the destruction of our unalienable rights. Freedom of speech. Freedom to travel. Freedom to gather. Freedom over our own health decisions. Will we ever get back our vital and long-held freedoms that are currently being lost at an alarming rate?

What can we do?

A lot more than
you think!

continued from
Page 1

The Government has been looking to pass legislation to make all protests, demonstrations, and disturbances illegal, and punishable offences. This will be the end of our democracy and freedom as the Government will then be able to pass any law they like and we will have no recourse to protest. If we allow this to happen, life will change beyond all recognition.

Independent Medical Doctors Perspective and Opinions.

Professors, Medical Consultants, Qualified Doctors, Virologists, and Scientists are working hard to bring light to the true mechanism of this pandemic. Their research to date has highlighted some very significant concerns regarding ineffective masks, PCR false positives, and the rushed high-risk poorly-tested vaccine rollout.

Below is evidence-based information on the key issues with links to websites and videos from reliable sources

www.ukmedfreedom.org/

Professionals supporting medical choice and informed consent. UK-based Medical Alliance.

www.worlddoctorsalliance.com/

Is an independent non-profit alliance of doctors, nurses, healthcare professionals, and staff around the world who have united in the wake of

the Covid-19 response.

"Support groups that have to be delivered in person can continue (in tier 5 lockdown) with up to 15 participants where formally organised to provide mutual aid, therapy or any other form of support" January 4th 2021

www.gov.uk/guidance/national-lockdown-stay-at-home#where-and-when-you-can-meet-in-larger-groups

So we help organise local formal support groups which are indeed for the mutual aid, therapy, and support of the group. Please do contact us by email at

info@newworldalliance.co.uk

If you are interested in meeting up and joining the conversation.

It's a great opportunity to meet like-minded people face to face and share news, views, and opinions.

Everyone is welcome!

The New World Alliance website formed in response to local Totnes community

THE New World Alliance website was formed in response to the local Totnes community and its expressed need for a spectrum of integrated independent media resources.

After being finally let out after the first Lockdown, the Totnes Truth Community came together under its old umbrella of Totnes Truth Juice. We met outside in various disguises and held private and public gatherings and talks and people took to the open mic on the streets to speak their truth in public.

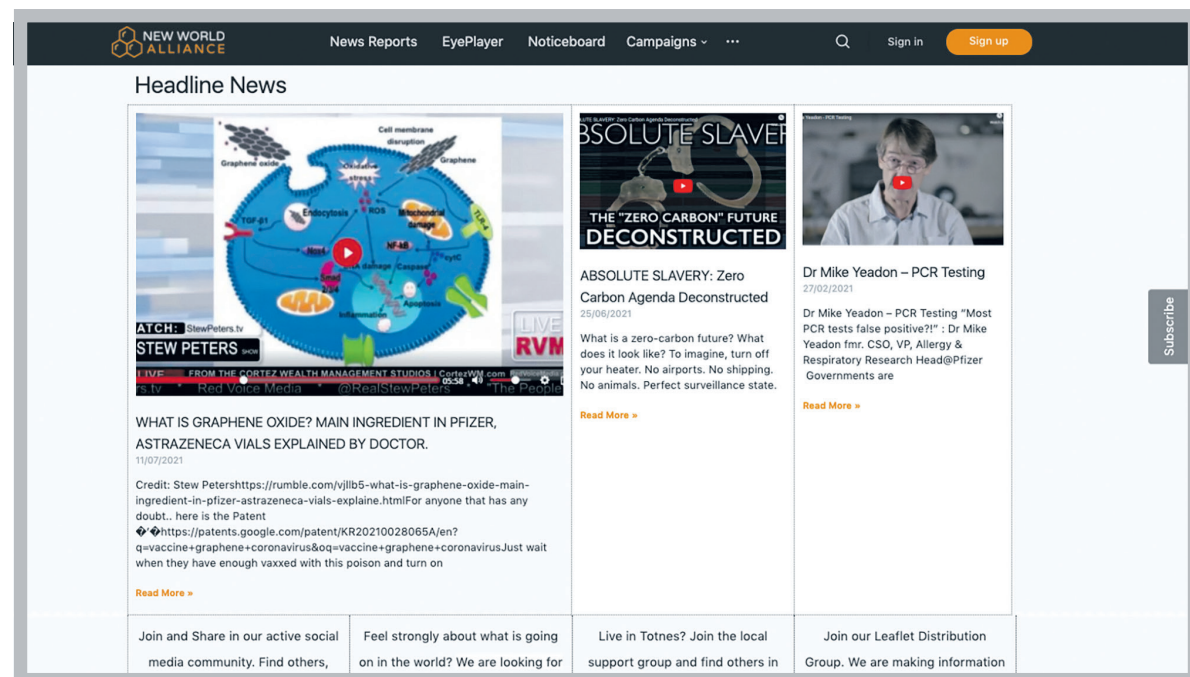

The unnecessary Lockdowns, the blatantly manipulated information and the experimental vaccine rollout agenda, had a rallying function and united people with a mutual understanding and passion to turn the tide. The manifest emergence of the New World Order and its sudden great play to create a New World Order of its own dictate, became a powerful unifying

Visit us at
newworldalliance.co.uk
or drop us a line at
info@newworldalliance.co.uk

force in itself. People are now continuously being pulled together, as it has become abundantly clear that the most important thing that we must do, in response to this attempted global coup, is to stand strong together against this global elite and their destructive agenda.

So once the important concept of alliance and community unity, being key to re-establishing our freedom, had become clear and the call was there from the local community, it was then that we chose to create the New World Alliance website and to offer these community based independent media platforms and resources.

You can email info@newworldalliance.co.uk This is the central point of contact that

The New World Alliance website

we recommend for anybody interested in keeping up to date with us, so check in with us there.

Do sign up for the Email List. We have an email guy called Pete, who will make sure that everyone on the email list gets a weekly email, to keep you up-to-date with what's going on. He runs a second Email list for active activists, looking to see things actually getting done which depends on your area of interest. Pete will also make sure he picks up any incoming emails so you can be reassured that if you email in to us, you'll be sure to get a response within a day or two.

The front page of the NWA website looks and functions as an online newspaper, highlighting the articles that are here in this publication and offering a regularly updated Notice Board for current local community and national events, marches,

demonstrations, political actions, and social activities.

Vital news, independent documentary channels, and alternative media information are all also available through the NWA websites video carousel iEyePlayer. This presents top alternative news media videos, presentations, and documentary clips that can be accessed and viewed easily, so you can keep up to date with everything without having to chase around.

The newworldalliance.co.uk website has an inbuilt Social Media Platform, which provides an excellent user-friendly uncensored platform and resources for groups to get together and communicate well. Each of the local NWA local town support groups has its own specific social media platform forum on the website, where the local town coordinator works as the group moderator

and supports the individuals in the groups with their local newspaper distribution rounds. We also have a Telegram page accessible through the website.

If you are interested in joining in with the local town New World Alliance face to face support groups and/or you would like to help distribute newspapers, please let us know your intentions and your location and we can put you in touch with your local town group and newspaper distribution coordinator.

If you are interested in joining our media team and have media skills, like video editing, WordPress functionality, newspaper article writing, tv video presentation, PowerPoint production, software skills or database management etc please also do get in touch as above and we can take it from there. It would be great to meet you.

NWA Support Group meetings in your area

People Realise The Importance Of Getting Together

NEW WORLD ALLIANCE began running support groups in Totnes once the first lockdown had finally ended in August 2020. It had become abundantly clear that we, as a community, needed to do the complete opposite of what the Government was recommending. Lockdown, social isolation, and social distancing were not the way forward. There was a clear and pressing need from the local community to get together, to meet up face to face on a regular basis, and to stand together. We needed to share our personal experiences, discuss the realities of the Orwellian nightmare unfolding before us and develop strategies of response and engagement.

As a result of various on-street altercations with the local police, we had come to know the local Totnes Police Sergeant Rob Wilson fairly well, so we decided to do the unexpected and to seek his endorsement of our activities to support and legitimise our social intimacy practices.

It was clear from the government website that even during Tier 5 lockdown that "...support groups of up to 15 people plus facilitators were permissible, for mutual aid, therapy and any other form of support" So we engaged in direct communication until we had a clear agreement.

Within a few meetings and email exchanges we managed to inspire the Sergeant to say, and I quote...

"...where meetings were essential, they should be held out of public view, in an appropriate venue, numbers of participants would not exceed the 15 maximum (this figure

being a limit, not a target) and the number of 'facilitators' would always be kept to a minimum. It is also important to note that the sessions would need to be formally organised and to offer clear support/aid or therapy. I would anticipate 'formally organised' to include clear start/finish times and a booking procedure (as opposed to a drop-in facility) Any support group meetings must be appropriately risk assessed and social distancing maintained."

This was really great news as it gave us the green light and enabled us to confidently step forward and develop the support group network structure which we have subsequently expanded around the region.

These groups have enabled people to share their emotional responses to what's happening, to share information about what's unfolding and it's enabled them to have important conversations to develop positive visions for the future and to build strategies of response.

Lockdowns do not work for the reason that they intended and clearly do far more harm and detriment to Society than good. However, it's clearly apparent that we are social creatures and we thrive on human reactions, interactions and relationships so it is especially important that we get together and communicate and socialize and interact and establish human communicative relationships with each other as a foundation of community unity and community action.

The resolution by revolution is going to come but it is going to come from the people up and not from top-down, not from the government, the mainstream media, the corporate monopoly or the Elite. Resolution by revolution is only ever going to come from the people up and is going to be a grassroots community movement that is already

Photo: Kevin Wolf

manifesting in a myriad of new face-to-face therapy groups and online communication platforms that are growing day by day.

We now have active community groups around the Devon county in Crediton, Exeter Newton Abbot Paignton Kingsbridge Plymouth Totnes and Dartmouth with new groups cropping up all over the place!

Please do email info@newworldalliance.co.uk to make general inquiries into the times, days, and locations of community support groups near to you. We have busy functional and very active support groups in the following local areas...

isolation is a major issue. People are often holding a radically different point of view to the mainstream narrative and yet can be surrounded by friends and family to still subscribe to the conventional story. Standing up and speaking out when surrounded by a peer group who continue to cling to misinformation as truth, can be extremely challenging and difficult. Joining and regularly attending a local support group where many people have the same values, perspectives, and points of view as yourself can be hugely reassuring and empowering. The opportunity to develop new friends, to have conversations with those of like mind, and a feel integrated into a growing community of people with a fresh point of view has proved to be of enormous value to many who attend.

Covid-19 vaccination in children – Major ethical and health concerns

PARENTS, teachers and just anyone who cares about the wellbeing of children should be asking this question: Is the current emergency covid-19 jab rollout a real or potential danger to children?

If it is, then surely in good conscience, we should stop it.

The Government has made it clear it wants to see over 12s given the Covid vaccine before the start of the school year in September.

But the Covid-19 jabs are NOT vaccines. Over the years we have become rather blasé about vaccines.

These are something very different and brought in under emergency legislation before, yes, before the official trials are even completed.

So, are we seriously considering giving young people, at a vulnerable stage in their development, experimental jabs, for a disease from which they themselves have little or no chance of suffering ill effects?

The UK government is going from strength to strength in its incompetence, unaccountability, lying and manipulation.

On 21st April it quietly amended the Children's Act to enable vaccination teams to go into schools and jab children without their parent's consent, claiming they have successfully sought, obtained and accurately recorded true 'informed consent' from the pupils, based on a 'Gillick Competency' protocol. They claim children will be shown the risks versus benefits of a Covid-19 jab and impartially present for and against arguments and pertinent factual information, such as the ingredients in the vaccines. On that basis children are expected after a short presentation, and with all the perils of peer pressure, to make their informed consent without reference to their parents.

The Moderna vaccine, for instance, contains SM-102 - and if you want to know what cancer and infertility look like, go and have a quick read of the safety data sheet on that little beauty. Let's be clear – the jabs are not proven to inoculate you against catching the disease (in fact lots of stories are hitting the headlines this month about jabbed people catching covid-19 and dying) and the extent to which

Is the current emergency Covid-19 jab rollout a real or potential danger to our children?

Photo: CDC

they may prevent you from passing on the disease is also unknown.

These injections instruct your cells, through an experimental mRNA messaging system, to manufacture its own synthetic covid spike proteins, a small part of the actual disease.

The body 'freaks out', detecting an intruder, and ramps up the immune system to attack what is essentially a part of your own body – something your body has produced.

Antibody Dependent Enhancement helps get the synthesised disease-parts into the cells, where they are replicated for an unknown period of time.

So when/if the jab wears off, have you trained your body to only be able to fight off covid-19 with the aid of a jab? What

happens when you come into contact with the real thing again? Isn't the ongoing process of the bodies' immune system attacking substances produced by the body itself an auto-immune disease?

All the vaccine trials have specifically excluded children. Effects of the vaccine on children are therefore completely unknown. The vaccines being rolled out have only limited short-term safety data and no long-term safety data available. Known potential, late-onset effects from vaccines that have not yet been ruled out include adverse immune response to infection, neurological disorders, autoimmune disease and pregnancy related problems which could take months or years to become apparent.

The Covid jabs are gene therapy, but they are being presented as

vaccines. When ingrained dumbed-down culture strengthens the iron hand of a wealthy and powerful pharmaceutical industry, it is easy (with the help of the media and social media giants) to shut down all debate about vaccines and gene therapy masquerading as vaccines, because the 'system' has decreed that only the correct opinion be heard. That is, that all vaccines always cure people and completely protect them from all disease, death and danger. We may feel safer. But it is just plain wrong and dangerous. We must conform to 'stay safe'.

Covid-19 experimental mRNA technology gene therapy injections are totally irresponsible so-called treatments to try out on anyone, let alone children. There are up to 10,000 people dead as a direct result of the jabs in the UK to date

and counting (based on 1,000 recorded deaths* and MHRA's printed acknowledgement that only between 1 and 10% of all adverse events are ever reported). There are up to 85,000,000 adverse events reported (1 or 2 per jabbed person).

Children are the least likely demographic to catch covid. The number of otherwise healthy children who have died of covid can literally be counted on 1 hand – thank God. The benefits of children being possibly even less likely to catch covid19 DO NOT outweigh the substantial risks of jabbing them with this risky and experimental injection.

During the Nuremberg Trials, the concept of properly informed consent in medicine was crystallised, recorded and written into law in Germany and in our own country. It was intended as a safeguard so that what happened in medical experiments and death camps in Nazi Germany would never, ever happen again. During the Trials, politicians, military leaders, doctors and scientists were all convicted of wilful harm, sometimes because they were simply 'following orders'.

Commencing research in children, in advance of published adult long-term safety data, could be in breach of the Nuremberg Code. We need not look far back into history to remember the devastating harms a rushed-to-market vaccination can have. Over 1,000 children were permanently disabled with narcolepsy caused by the Pandemrix Swine Flu vaccine. Rapid rollout of a new vaccine for Dengue fever resulted in the deaths of 10 children in the Philippines, not at the time of the vaccination but months later when they next encountered the Dengue virus. To repeat any such mistakes here would be unforgivable. The immune system is phenomenally complex and still poorly understood. Experimenting on young children for a disease that carries vanishingly small risks is a road no ethical scientist should walk down. It is a clear departure from the precautionary principle and many independent scientific experts strongly advise against it.

For further supportive information please visit...

www.hartgroup.org/covid-19-vaccination-in-children/

With over 30 years experience Dr. Bossche can hardly be described as an ‘anti-vaxxer’

Dr. Geert Vanden Bossche PhD, DVM is a world-renowned vaccine developer, headed projects for Glaxo-Smithkline and Novartis, worked for the Bill & Melinda Gates Foundation and GAVI, was Head of the Vaccine Development Office for the German Centre for Infection Research (DZIF) and had a vaccine consultancy business from 2012 to 2019.

With over 30 years’ experience in the field Dr. Bossche can hardly be described as an ‘anti-vaxxer’, but nevertheless has issued a dire and urgent warning about the serious dangers of creating uncontrollable pandemics due to the way in which the new covid experimental genetic drugs being pushed hard around the world actually work.

He writes:

“Immediate cancellation of all ongoing covid-19 mass vaccination campaigns should now become THE most acute health emergency of international concern. I don’t see how mass vaccination campaigns would not lead to a disastrous aggravation of the covid-19 pandemic. However, no one else seems to realise; instead, vaccinologists, clinicians and scientists are merely focusing on the (positive) short-term results and impact at an individual level. Nobody seems to be looking at the consequences and risk at a human population level (which, according to my understanding, will become manifest quite soon).

Why is nobody worried about ‘immune escape’ whereas covid-19 has already escaped people’s innate immunity as reflected by multiple emerging, much more infectious, viral variants (most likely due to the global implementation of infection prevention measures)? Vaccine deployment in the ongoing mass immunisation campaigns are highly likely to further enhance (adaptive) immune escape as none of the current vaccines will prevent replication/transmission of viral variants. The more we use these vaccines for immunising people in the midst of a pandemic, the more infectious the virus will become. With increasing infectiousness comes an increased likelihood of viral resistance to the vaccines. It’s not exactly rocket science,

Dr. Geert Vanden Bossche PhD, DVM

it’s a basic principle taught in a student’s first vaccinology class: One shouldn’t use a prophylactic vaccine in populations exposed to high infectious pressure (which is now certainly the case as multiple highly infectious variants are currently circulating in many parts of the world).

To fully escape selective immune pressure exerted by vaccinal antibodies, covid-19, a highly mutable virus, only needs to add another few mutations in its receptor-binding domain. I am beyond worried about the disastrous impact this would have on our human ‘race’. Not only would people lose vaccine-mediated protection but also their precious, variant-nonspecific, innate immunity will be gone (this is because vaccinal antibodies outcompete natural antibodies for binding to covid-19, even when their affinity for the viral variant is relatively low).

As a dedicated virologist and vaccine expert I have alerted all responsible health and regulatory authorities, including WHO, CDC, FDA etc. and I have asked them to consider my concern and to immediately open the discussion about the disastrous consequences any further immune escape of covid-19 would have. I know, of course, that current mass vaccination campaigns enjoy

vigorous and world-wide support from a multitude of different parties/ stakeholders. However, unless I am proven wrong, this cannot be an excuse for ignoring that mankind may currently be transforming a quite harmless virus into an uncontrollable monster. I’ve never been that serious about a statement I made.”

Now while Dr. Bossche’s answer is still for yet more mass vaccines (of a specific kind that he proposes) no professional health practitioner should ignore the warnings this highly-credentialed expert is giving. Anybody considering (or being coerced into) getting these injections certainly owes it to themselves to research into what mRNA vaccines do to the cells in the body, and whether being part of a mass clinical drug trial, for which the companies producing the drugs have no liability, is the best route to optimal health. Tried and tested ancient wisdom, which managed to take mankind from first steps to shiny cities, such as, eating nutritious, natural, soil-grown food, taking nutritional supplements, taking regular exercise and avoiding poisons, chemicals and electromagnetic radiation, are what most non-Pharma affiliated doctors and nurses promote, and we heartily agree.

Doctors who explain clearly why vaccines aren’t safe or effective

Many more doctors are testifying that vaccines aren’t safe or effective. See our extensive list on the back page...

The Light newspaper is a new independent alternative publication

One purpose of the structure of the media cartel is to monopolise the narrative and control the way people think and what we believe. The Light newspaper challenges this one sided view and brings a balance to the table advocating free speech and open public debate not censorship.

THE Light newspaper is a new independent alternative publication offering a different point of view to the mainstream media narrative.

First published in September of 2020, they have had increased production month on month since then. The newspaper is excellently written with some very articulate and sensitive journalists that have been able to convey new concepts and understandings of a subtle nature in a way that is relatively easily digestible by most clear thinking people. What they say seems to be common sense, fair, reasonable and appropriate and yet at the same time they offer a radically different viewpoint to the monopoly mainstream story.

The Light newspaper has subsequently given communities a fantastic opportunity to offer people in their hand, an alternative perspective, a different point of view and the foundations of a new and important conversation. Their logical analysis, factual interpretation and their painting of a different picture is refreshing, inspiring, and has the power to change hearts and minds.

A lot of people are ingrained into the habits and thought patterns of their lives, and habituated to the information that they ingest through the television, the radio, mainstream newspapers, and mainstream

media on the internet. These people will rarely get the chance to consider another point of view. And that's the point. One purpose of the structure of the media cartel is to monopolise the narrative and control the way people think and what we believe. The Light newspaper challenges this one sided view and brings a balance to the table advocating free speech and open public debate not censorship.

New World Alliance has been supporting distribution of The Light newspaper and since the 1st January 2012 has helped distribute around 5,000 newspapers across Devon every month. Initially the distribution was rather haphazard, with people grabbing stacks of newspapers and disappearing off and putting them through letterboxes, distributing them on the streets and leaving them in strategic places like supermarkets or on the train. This was seen as great, obviously, but insufficient to just employ guerrilla tactics and encourage spontaneous activism alone. More organisation was clearly called for, to get the most out of the distribution network.

Many local groups in Devon meet regularly and are coordinated and facilitated by dependable and reliable people. These local town group coordinators are stepping forward and working with administration teams to make clearly delineated

paper rounds whereby each town in the region is being systematically divided up into an A4 map, with clear boundaries, street names and postcodes. Designated paper rounds for people have been created to distribute the light in each of the major towns in South Devon. This is bringing a much more functional and reliable system into place and actually is more fun. The vast majority of people who deliver the Light Newspaper experience a lift in their energy, a positive worthwhile feeling and enjoy the exercise !. Every paper posted is an opportunity to bring new insight, bringing some hope of light, perspective and a fresh point of view into a home, and a chance for others to discover a different new conversation.

If you're interested in distributing this newspaper and The Light newspaper, if you feel that the time has come to get off the sofa and do what you can to turn the tide, then please do get in touch.

You can email the local groups by emailing the website info@newworldalliance.co.uk. If you give your name and location, we will forward your email to the coordinator of your most local group and you can join the teams and together we can make a difference.

The Light is packed with valuable news and information

The Freedom Hub Network is a movement for freedom

THE Freedom Network is a non-political and inclusive movement taking action to reclaim freedom through individual and collective action.

The movement regards equal rights for all to be the best basis for a healthy society.

The Freedom Network believes in individualism and

not communitarianism, meaning the individual has the right to be heard as a sovereign being.

Each hub brings together people from backgrounds to share advice and information, receive and give advice and give support and take steps towards a future where our freedom is never treated as optional. You will find a hub located in your

county or metropolitan area with multiple branches feeding into a hub as the network evolves.

It gives you a chance to meet up with like minded people and take regional and national action. As the hubs grow, the aim is to spread out into neighbouring towns and feed into the county hub. One of the key campaigns is to scrap the Coronavirus Act and

to ensure that Common Law is upheld. This means lobbying MPs and Government and organising protests. The hubs work with a growing number of professionals and support local businesses. They print leaflets and distribute The Light newspaper. They also seek to connect with like-minded groups and people.

Above all the hubs encourage

the active participation of members and fresh ideas.

Why not join a freedom hub yourself?

Meeting Totnes Monday 6pm.

For more information see...

www.thefreedomnetwork.co.uk/find-a-hub

Plymouths UK Column has become Britain's most watched alternative media news programme

UK Column.org has become Britain's most watched alternative media news programme. UKColumn.org broadcasts live at 1pm every Monday, Wednesday and Friday.

An hour long program is presented that is specifically designed to meet what they describe as the needs of "Middle England".

Consciously and deliberately not wishing to appear as "Conspiracy theorists" they are sticking religiously and doggedly to the facts and to realistic interpretations of The Office for National Statistics figures and facts.

UK Column.org is a local Devon based alternative Media outlet that has been going for more than a decade. It is tremendous that the southwest is producing such a large volume of quality alternative media and UK Column.org is the Jewel In The Crown of the region. UK Column presenters have now become national celebrities, being surrounded by flocks of people

whenever they attend a local or national event, which they do on a regular basis. These down-to-earth gentlemen work hard and yet come across as being relaxed, focused and completely sincere.

Presented with calmness and clarity the programs founder Brian Gerrish is an ex lieutenant Commander in the Royal Navy. As a lieutenant commander he dedicated his working life to the defence of our country, believing in the narrative, however when he retired he took off his captain's cap, took off his blinkers and decided to think for himself. After experiencing a number of extraordinary events he was led to the extraordinary conclusion that the world was not the way they tell it. He knew then that the true mission or his life was the defense of his country but not in the way in which he had originally thought for so many years. Brian Gerrish got together with Mike Robinson, a highly intelligent and gifted Gentleman with huge energy for the truth and they formed a newspaper called the UK Column. This was distributed widely across the country and was hugely popular. Then an opportunity was presented to them to appear on the Sky TV platform and present information

Brian Gerrish and Mike Robinson delivering their regular independent news program

across Europe on the Satellite system and the idea was born to create a video news program.

Now their insightful news program can be seen and streamed from their website UK Column. org This is an absolute must watch for those who want to know the truth about what is actually unfolding. UKColumn.org will systematically take news stories from the government and mainstream media

and look deeply and sincerely at the underlying facts, deep statistics and discover the truth of the matter and re-represent the news in the light of the new reality. This has been tremendously popular and is a fantastic service to many, providing opportunities to join the dots. UKColumn.org really is THE place to confidently send people, where you know that the information that they

will receive has been thoroughly researched, independently analysed and presented in a professional and intelligent manner.

Do check out their website and sign up to their newsletter and keep in touch with the UK's number one alternative news program - from the heart of plymouth.

Keep Britain free

HOW do you feel about being told where you can go; who you can see; and what you can do?

This country has a proud history of fighting for freedom. Yet the Government has used lockdown to strip away our liberties. Every aspect of our lives is now controlled by draconian rules and regulations.

We are told how many friends we can have; whose houses we can visit; where we can – even what to think. Our children cannot return to school. Businesses remain shut. For months, churches, mosques, and temples were simply locked up. Collective acts of worship remain banned. We cannot go to pubs, restaurants, gyms, cinemas, theatres, or beauty salons unless

we are told we may do so.

We cannot take a foreign holiday unless we want to spend two weeks in quarantine when we get back.

These measures are devastating the economy. They will ruin lives for generations. Millions of people have already been put out of work. Left to their own devices, politicians will seek to control us.

Keep Britain Free is a movement representing millions of people who want to think for themselves and take responsibility for their own lives.

Keep Britain Free is a movement that is not a political party. They are a group of independent thinkers who seek to influence people and politicians, come to polling day.

Keep Britain Free is a movement

that stands for Freedom: of speech, choice, and thought. Keep Britain Free is a movement that champions life, liberty, and the pursuit of happiness.

A government exists to protect its citizens. The people need to get back to this simple premise and judge the Government on this criteria. By coordinating our efforts we as a community unity can ensure that our voice is heard at the heart of government and bring about real change.

Please join the Keep Britain Free Movement and help Keep Britain Free.

www.keepbritainfree.com

Voters in the South Hams district can now cast their vote in the County Council elections for a new political party that wants to end the lockdowns, protect medical freedom of choice and protect our human rights and liberties.

New political party in South Hams champions freedom

The new Freedom Alliance political party fielded candidates in all seven of the divisions in South Hams.

Dr Stephen Hopwood, local party spokesman and a doctor of medicine who has worked in Totnes as a holistic practitioner for 25 years, said: "These are unprecedented times and we decided to stand to directly oppose what is happening in our community. More and more people are intelligently analysing what is true and what is not and beginning to see through the false narrative."

The economy has been ruined and individual freedoms massively curtailed. These actions were never justified by the threat. Our fundamental human rights are in real danger of being lost and we believe we must act to protect our community and humanity.

The Freedom Alliance Political Party is committed to the principles of personal freedom. The party believes everyone has the right to choose to leave home whenever they wish, to meet with whoever they want and operate a business and make a living as they need to.

The Freedom alliance believes that freedom of speech and the freedom of people to gather are fundamental human rights.

Importantly, they consider everyone should be free to make their own medical choices – whether to have a vaccine, get a test or wear a mask.

Dr Hopwood said: "We reject the kind of restrictions that have been imposed on us in the last year under the guise of a pandemic which is just not justified by a proper rigorous scientific study of the data.

Photo: Shutterstock

"We have seen the threat of Covid exaggerated and large numbers of deaths caused by the lockdown itself. People were unable to get treatment or were not diagnosed for other illnesses. The toll on mental health and on society as a whole has been appalling.

"Old people have been imprisoned in care homes. Children have seen their education blighted and been coerced into virus-testing regimes and mask-wearing which is hugely psychologically damaging. Businesses and livelihoods have been unnecessarily destroyed."

The Freedom Alliance is calling for an end to all lockdowns and believes any testing or vaccination should be completely voluntary and any "decline" should not lead to adverse consequences. The party rejects compulsory mask-wearing and says vaccine passports are unnecessary and discriminatory.

Dr Hopwood stood in Totnes and Dartington; Christian Parkes in Dartmouth and Marldon; Pete Burgess in Kingsbridge; Jim Blake

in Salcombe; Simon Gedyes in Ivybridge; Emma Relph in Bickleigh and Wembury; and Jim Sandy in South Brent and Yealmpton.

Freedom Alliance is the one of a few new political Parties that stands for the Principles of Liberty, Sovereignty and the Preservation of Human Rights.

Freedom Alliance is a political party that is standing in real and direct opposition to the

Government, mainstream media, and scientific narrative.

The other established mainstream political parties have failed to offer any cohesive opposition. Labour, Liberal Democrats and the Greens have just jumped on board with the narrative, hook line and sinker, without any proper analysis of the facts that are self-evidently highly questionable.

History has taught us that we can't always blindly trust our governments or pharmaceutical companies to act in our best

interests. History has also taught us that the most horrendous atrocities can occur when people are forced to blindly follow their leaders and their authoritarian agenda, especially when this is without any right to question, to protest, or to choose another way.

Freedom Alliance believes in the absolute rights of the people to:

Have informed consent for any medical intervention

The legal basis for consent is that

testing or vaccines as there are just no medium or long-term studies on these impositions.

The introduction of vaccine passports and mandatory testing is a violation of our human rights, as it coerces people into having a medical intervention through the threat of otherwise huge restrictions on their freedoms or loss of employment.

Freely associate, assemble and protest

Solitary confinement and

Photo: Fabio Alves

a person has a full understanding of the medical intervention they are agreeing to and that they do not feel coerced in any way. There is currently too much coercion, censorship of debate, and lack of transparency to enable people to make a truly informed decision. Informed consent and risk assessment compliance is simply not possible with masks,

human isolation are punitive and harmful and we believe that people should never be prevented from socialising with one another. Furthermore, people's power is essential in a democracy and is only possible if the people can come together in numbers.

Therefore, in the interests of democracy, we support all peaceful protests and oppose all government

attempts to curtail this democratic right to associate and protest.

Speak freely without censorship or penalty

Never before have we seen this level of media censorship. Information is censored not because of the reliability or source of the data or the credentials of the expert providing their opinion, but rather on whether it contradicts the current mainstream narrative. We believe that people should be allowed access to all opinions so that they can make a fully informed decision for themselves.

Make a living and operate business premises, because it is a fundamental human right

Businesses should be allowed to open without restriction or penalty and without the requirement to comply with mandatory activities.

Leave home whenever we choose

We must maintain and preserve our right to be able to leave our home and travel freely across both

this country and abroad without vaccines, testing or quarantine.

Be free of this impact on Our Local Communities

We are all concerned citizens of the South Hams community who have stepped forward because we are deeply disturbed by the impact the government response to Covid has had on our local communities and we want to offer a viable alternative for people to rally behind as a realistic way out of this situation:By ending all covid-19 restrictions - because we consider the impact of these restrictions to be worse than the ill effects of the virus itself.

Back in March 2020, our government stated that there needed to be an end to ‘non-essential contact’ and ‘non-essential business’. Our government, without consulting its people and without offering a choice, decided that it was non-essential to see loved ones, attend funerals, be with family when they died, hug, move freely, have access to education, socialise, sing, make a living, but

most important of all to have freedom to make informed choices. These are our basic human rights and this is because they are the basis of our humanity and the foundation of our well-being.

Health

The restrictions are justified by the notion that people can spread the virus without knowing they have it and yet there is no evidence that asymptomatic people spread the virus.

Many would argue that the impact of the government restrictions is not worth the national 0.29% death rate of COVID-19. To put this into perspective, the death-rate for smallpox is 30%.

A Brighter NOW for our children and young people

We insist that our children and young people are provided with the education, social engagement and mental health services that they need to thrive.

Cohesion and Hope, rather than Division and fear

Although our communities have been providing amazing support for one another, the impact of the fear-led COVID narrative and lockdown measures placed huge strain on our social cohesion. Councils even called on people to inform on those considered to be breaking lockdown rules, sowing seeds of suspicion and division in our communities.

Stand for the right of local businesses to trade freely in any way they choose

Lockdown has caused devastation to our independent local shops and businesses

Businesses dependent on tourism were badly impacted. Many businesses have gone under.

Truth, Transparency and Restoration of Trust

It is hard for anyone to make an informed decision because the data readily available is so selective. For example, we regularly receive updates of the case numbers and number of people who have died within 28 days of testing positive, but the figures where COVID-19 was mentioned on the death certificate are significantly lower.

We want our local councils and health authorities to remove the smoke and mirrors and present the facts as they are for people to feel able to make their own informed decisions.

A Ban on Vaccine Passports and Testing Certificates

The potential future for Devon

is a segregated society, with those not vaccinated not having access to the same freedoms enjoyed by those who have been vaccinated. The vaccine has been shown to not prevent reinfection or transmission of a virus that has a very low death rate. To restrict the unvaccinated would be a blatant breach of their human rights.

The fact that 20 candidates stood contesting 60 seats means that one third of all the County Councillors were facing resistance from Freedom Alliance candidates which is a massive growth in the presence of a real opposition. At the next elections voters will be primed to consider this emerging party impressed by their efforts at their first election. Real new policies, based on real evidence based science are being offered by this new and rapidly expanding political party, for the public to decide, which way forward we will all ultimately go.

‘Time to make your stand!’

Sundays 10am - Near you

Stand in the Park first started in Australia in response to the lockdowns and has now grown into an international movement.

Brady Gunn was just a lone individual who one day, appalled by the Government's grossly disproportionate lockdown measures, decided to stand alone and silent in his local park. Hyde Park in Sydney was the park where it all started and now his idea has caught like wildfire and rippled across the planet. Today there are Stand in the Park events every Sunday, at 10am local time, on every continent, across the world.

Participants are invited to wear something yellow to help them be identified. Early events here saw people turning up and missing each other - but soon the connections began to build, the smiles rippled through the crowds and a new movement was born.

Initial organisers explain that it is not a demonstration, it's a peaceful stand, by individuals who want to express their commitment to personal truth and freedom for all.

The events go on, rain or shine, each week, with newcomers every time.

Totnes was quick to get onboard with its own Stand in the Park and has got in on the act with a regular gathering at Longmarsh, down by the Rowing Club, on Bridgetown side of the river Dart.

Karen Hunt was the local

lady who decided to set the ball rolling: "Part of the point of it is that it's not a protest and there is no named organiser. If I hadn't said let's do one in Totnes when I did, I have no doubt someone else would have done."

The number of Stand in the Parks has grown massively over the last few months, with new towns and villages keen to take part and gather people together.

Karen added: "It's individuals taking a stand for their own personal rights and freedoms. It's something I felt I could do, and I was happy to do it alone if need be."

"What it has done for me is to not feel so alone or alienated as I watched a large part of society seemingly happy to give their human rights away without questioning why."

Wherever you are the chances are that there will be a Stand in the Park near you every Sunday at 10am. And if there isn't, it's easy to set one up!

"I've enjoyed meeting new like-minded people. It's given me a wider social network and even helped with my business too," Karen said.

"I think it's important that we have that consistency and reliability so that should our usual ways of communicating go down we'll know when and where to meet, so it's about local resiliency too."

Stand in the Park has become a regular - must attend - feature in the busy weekly diary of activities

A STAND IN THE PARK
Making a Stand for Freedom
Stand with us every Sunday 10-11am in over 600 parks worldwide
We are drawing a line in the sand & making a Stand
ASITP is a worldwide collective of every day folk standing in personal truth in their local parks. Rain, hail, shine, we Stand.
These are not protests, not demonstrations; we are individuals Standing in unity for freedom!

available to Devon truth seekers. These events are for people who search for some new foundation in understanding reality, who look for a new community with a fresh outlook on today's world events and for people who want to find out more about this new direction.

Do come along, you will find lots of smiley faces. Antisocial distancing does not apply.

www.facebook.com/groups/232506381948373

You can find Stand in the park events across Devon:

- Rock Park, Barnstaple.
- Victoria Park, Bideford.
- The Green, Budleigh Salterton.
- The Pavilion, Chulmleigh.
- Crediton Park (near play area), Crediton.
- Royal Avenue Gardens, (Band Stand) Dartmouth.
- Exwick Playing Fields (Car park), Exeter.
- Northernhay Gardens (War memorial), Exeter.
- Manor Gardens (Bandstand), Exmouth.
- Millennium Green, The Glen, Honiton.
- Bicklescombe Park (top car park), Ilfracombe.
- Courtney Park (Bandstand), Newton Abbot.
- Young's Park (Bandstand), Goodrington, Paignton.
- Freedom Fields, Plymouth.
- The Meadows Park, Tavistock.
- The Den, Teignmouth.
- People's Park, Tiverton.
- Torre Abbey Green, Torquay.
- Longmarsh (opp Rowing Club), Totnes.

Devonians storm up to the London marches in droves

AS well as local action, many people from Devon have taken the train, or the bus or driven in cars to London to be a part of the many anti-lockdown marches and events that have taken place.

The media reporting of these has been almost non-existent and when they have reported on these events, they have massively under-reported the number of people taking part.

News stories have said a few hundred people, maybe tens of thousands, when the real figure at the largest has been closer to a million.

Those who have gone up to take part and show their anger and dismay at the Government snatch of our rights and liberties in the name of a hyped up 'pandemic' have been thrilled by what they have experienced.

Jannie from Totnes went up to London for the recent march and came back glowing with excitement. "It was awesome to be among so many people, protesting peacefully, united in their love of freedom and truth. It has been exciting, awe-inspiring and emotional." Jannie went up with 25 others from the Totnes area in a peace convoy. "We had a great time, we all stayed in the same Hotel which we completely booked out. Very good exercise and fantastic conversations and camaraderie. I'll be going again!"

People have walked for miles with crowds all around them through the streets of the capital, some with banners, often chanting songs. They have picketed the BBC headquarters; they have marched past Downing Street. They have even invaded a shopping mall. They have made their opinions clear and done so in the most incredible numbers.

"To be part of something like this makes it very clear that it is not just you who has realised there is something very wrong going on in our country and across the world. The measures imposed on the people of our land have been disproportionate and based on dishonest data and fear-based propaganda, put out by a dishonest media."

The Coronavirus Act 2020

shone a huge light on all of the failings of the Government. Many people felt that the restrictions

that were placed on our lives, and continue to be placed on our lives, are not reasonable or

proportionate. They smell a rat.

The media and the politicians may try to dismiss us as "conspiracy theorists" but we are many, and the London marches prove it. To us as well as them. We are many and we are of one voice. We love freedom and we expect the Government to protect that freedom and we've come to reclaim it.

At first the numbers were modest but over time they have grown. There is a genuine thirst for honesty and accountability.

Such a large number of protestors – even if the mainstream media ignores them and dishonestly records the numbers – cannot be ignored. The very absence of reporting when so many people take part – including our own contingent from Devon – just reinforces the idea that they are hiding the truth and that they are colluding with the Government to ignore the counter arguments.

Organisations like Save our rights at saveourrights.uk and Standup X at standupx.info provide regular updates on upcoming marches and events for mass peaceful gatherings. So, whether it be on Plymouth Hoe or on the streets of London, you can make your voice heard and enjoy the thrill of being surrounded by crowds of like minded people.

<https://www.standupx.info/> StandUpX Mission

StandupX seems to be coordinating the fortnightly London and Nationwide marches. We decided to check them out, see where they might be coming from and so this is their online mission statement....

"We do not consent to the illegal and disproportionate COVID-19 measures.

We believe we are living in a state of authoritarian control and that there is no opposition in government. The Police have been unleashing violence on peaceful protestors. This describes a Police State Dictatorship. We do not consent to Government social distancing measures destroying public and private life. We do not accept enforced masks. We do not accept a dictatorship of lockdowns, ruthless demolition of small businesses, criminalising peaceful

citizens & acts of Police brutality. No Covid Jab. Forced, coerced and mandated injections violate the Nuremberg Code which states 'the voluntary consent of the human subject is absolutely essential' in any human experiment. The trials are rushed and not capable of determining long term impact or comprehensive demographic analysis. This is a medical experiment of epic proportions, which proposes to alter the human body's natural genetic behaviour. Nobody knows what impact this will have long or short term or how many will be injured or die as a result of this. The Pharma companies will NOT BE LIABLE for any injury, death or unacceptable impact caused. If this kills and damages huge numbers of people, the corporations walk away with no consequences and a huge profit."

So there we go, they have made it pretty obvious, where they stand, what they will stand up for and what they will stand up and march against. It is clearly all about Freedom. Please do check out their telegram group and website for the latest event updates.

Their stated mission is to bring a real democracy to the UK and to end corruption. Changing the systems so that the interests of the people are the driving force, rather than those of big corporations and archaic institutions. To fully enact and preserve human rights and civil liberties in their truest sense. To implement a better way of doing things that puts the individual at the heart of everything. To bring forth solutions to problems, positive change, transparency and accountability. Their vision is a free and liberated society which values, inspires and serves the people, providing the foundation for our nation to truly thrive. A Real Democracy.

Trooth Community Assembly offers face to face weekly local meetings with a common law focus

COMMUNITY Assemblies are groups of women and men who provide mutual support to residents and each other to ensure all are treated fairly by the authorities, including health and social care services. These Assemblies are made up of residents concerned about a lack of democratic process at a local and national level, dedicated to preserving and asserting our inalienable rights and obligations to ourselves, the planet and future generations.

The Community Assembly is not a new concept and it has been around since King Alfred who introduced it between the years 870 and 890 AD. Trooth Community Assemblies abide by Natural Common Law which is the very bedrock of our constitution with all other laws being subservient to it. The four main tenets of common law are :- Do no Harm, Commit no Fraud,

Cause no Loss and Keep the Peace. Trooth Community Assemblies aim to build a network of people in Assemblies across as wide an area as possible to do the following:-

Gather and disseminate information: Please join Trooth Community Assemblies if you would like to play a more active role in bringing truth and support to as wide an audience as possible. This cooperation between Trooth Community Assemblies and other organizations has allowed them to achieve much more than was originally dreamt possible in such a short timeframe.

Expertise & Support: Trooth Community Assemblies aim is to use the expertise of individuals within local groups to help and support others. Trooth Community Assemblies are now setting up Community Assemblies across the British Isles, and are in close touch with Assemblies in Canada as well as fledging groups in the USA and South Africa and are offering support to other countries

in any way that they can. The Community Assemblies operate under Common or Natural Law and allow members to take back control of their own lives. Fair Treatment: Trooth Community Assemblies aim to ensure that members are treated fairly by authorities, including health and social care services which are currently denying individuals much needed care. They have a wealth of natural healers and care professionals in their ranks and it is not beyond the scope of their vision to run their own health

service. Building Communities with skills and roles: Trooth Community Assemblies need people from all walks of life and all skill groups.

The aim is not to move you away from other social media platforms, but rather to provide another means of communication amongst like-minded individuals in face to face meetings. They now cover the whole of the British Isles as far as National and Regional Assemblies are concerned and we are busy setting up Local Assemblies. The Common Law Courts are also now training constables to enforce the law and trooth Community assemblies have become engaged with that process. The Common Law Courts are providing the training for Peace Constables in the formation of a new Peace Force. People have the right to make their own decisions and walk their own path and that is exactly what the Community Assemblies are all about. Common Law Courts want people to take responsibility for their own lives

and, through their own actions, create a stable and lasting community throughout the world. Whenever a discovery is made, or a solution obtained, the aim is to share that achievement with the rest of the community for the simple pleasure of helping others.

How to join ? Fill in the contact form on their website <https://ke-ca.co.uk/> and you will receive an email once they have processed your application. Notifications of meetings and seminars are posted through the Community Assembly Trooth groups.

<https://ke-ca.co.uk/> can either attach you to a current local Trooth Community Assembly or let you know when one forms. <https://ke-ca.co.uk/> is not an online chat group but groups of real people meeting face to face making decisions over the administration of their own communities. The commitment is to natural or common law.

‘Trust in God and tether your camel’ - Preparation for an uncertain future

THERE is no doubt that we are indeed living in unprecedented times. The changes that we have all seen happen to our lives and those around us in the last 18 months, could never have been predicted by the common man -although perhaps by the WEF. However for all this to have come about it is very clear that the likelihood is that yet more change is most likely to be around the corner.

Supply chains are breaking down with vital raw materials in short supply and key components in production lines no longer readily available. International shipping has been severely hampered by many recent events including one entire major Chinese port being closed, shipping containers in very short supply and the blocking of the Suez canal.

Food supplies are already being hit and shortages are, according to mainstream media sources, on their way. These potential food shortages are but one variable in a rapidly changing world of uncertainty. We clearly cannot continue to rely on the world being in the way in which we have always been used to. Preparing for certain changes, of an uncertain nature, is certainly a difficult task. But the basic principles of human survival remain the same, we need clean water, nutritious food, functional shelter, fire for warmth and cooking and most importantly we need each other's company.

One of the primary aims of developing this newspaper, the website, the newspaper distribution network and the face-to-face and online support groups is to bring the community together in preparation for this transition of uncertainty. ‘United We Stand divided we Fall’. This isn't a new statement but it's

truth is becoming increasingly and more urgently apparent. Building local communities of people that understand the new rules of the game is key to playing the game well and to winning - whatever that may look like.

We all have to learn how to shift identities in relationship to shifting circumstances and the new roles that we have to play in life and our wider society. Preparing to be independent of the State and the current corporate Monopoly is a daunting process but one that we now must consider to be worthwhile. ‘Better Safe than Sorry’ is another universal maxim that also seems to be gaining renewed popularity. ‘Trust in God and Tether your Camel’ is yet another favorite.

So although in our deepest hearts we all do trust, as Bob says, that ‘Everything will be alright’, if we don't ‘Make Sure’ that we have actually got food, water, shelter, fire and a good community available

and functional, then we may just not have means and mechanisms of survival that might be suddenly required. We may find that our Camel has indeed wandered off.

What we know to be ‘reality’ is shifting, what was normal is no longer and a new normal seems to be being imposed upon us. The old normal was never normal in the first place. But our community based new normal is a much more responsible and self reliable strategy, based on accepting this new reality and by engaging with this now reasonable and appropriate preparation, for what is surely going to come to pass.

Many of the local face to face support groups have ‘Preparation’ as one of the focuses of the support groups activities. So please do come along to a local group and you can get the help you need to start the ball rolling down the road to self-sufficiency and sustainability, in a way that is integrated into your local community.

Lawful Observers are here to protect people against police corruption

Lawful Observers are on the streets to protect people against police corruption and abuse of power

AS far back as 2016, there were plans for Common Law community Officers/ Constables to be trained up and to protect people and property against State Police corruption and abuse of power. The concept established itself in its complete fullness last year, meetings took place, many conversations were had and a collective of people from different groups and diverse backgrounds came together and founded the Lawful Observers - for the purpose of creating a community policing 'by the people for the people.'

To put things simply Lawful Observers observe the police, record what is happening and if needed use what is observed to hold them accountable for their actions, compliance with the law including bringing about prosecutions.

"Policing by consent" is actually the real foundation in law by which the Police affect their current duties. This perspective can shift the identification so that 'Police are the Public Servants who serve us and the Public are the Police who are Policing the Police'.

Dave Bloch has lived in Totnes for 21 years, has won titles for local natural bodybuilding competitions, worked as a life coach, and spent a 19-year career working in local prisons substance misuse services. He is a serious guy who takes life seriously but has a kindly manner and a gentle voice, but I wouldn't mess with him. He doesn't seem to blink much and looks you straight in the eye.

"I became a Lawful Observer student/volunteer so that I could deepen my understanding and

Photo: Jhn Lucas

intellectual appreciation of how both Common Law and state legislative statutes influence our daily lives and also to learn what we can do, lawfully and honourably to protect our inalienable human rights."

"Undertaking the Lawful Observer training has really opened my eyes to what 'Policing by [Public] consent' is meant to look like, and how it's vital that the public are actively involved to ensure the Police code of ethics are being upheld and that we support our Policemen and women to carry out their duties lawfully.

"The Lawful Observer training informed me how Policing best practice is actually via something called "due process", it has taught me what is really meant by "duty of care" and the "impartiality in the service of the law."

"All this helped me to realise that as a community we do have a responsibility to assist and support our policemen and women and it is our important duty to hold those constables/ officers accountable if they stray from due process when Policing."

"Personally, attending the Lawful Observer training has strengthened my knowledge of our rights, given

me the confidence to stand up for these rights, and the knowledge of how to conduct myself in a peaceful and assertive manner when dealing with these issues in public."

Lawful Observers are here to support and protect what is right, fair, and just and hold those individuals accountable when it is not.

"Lawful Observers propose that a national network of volunteers be known as 'Lawful Observers' formed to serve the interests of all people, the British public. The formation of a national organisation of 'Lawful Observers' will ensure we have a well-trained, proactive establishment of volunteers. 'Lawful Observers' will report on and evidence the failings and unlawfulness of establishment agencies. 'Lawful Observers' role is one of protecting our individual rights which rests with the people. Those guilty of crimes against the people should be charged and brought to trial. If the police refuse to act appropriately, we the people must expose their failings."

As a 'Lawful Observer,' you are asked to confront and report crimes and other issues of importance, especially where the police have refused to act. A

'Lawful Observers' evidence and willingness to give testimony will serve to achieve successful criminal and civil prosecutions where necessary. Identifiable criminality perpetrated by magistrates, bailiffs, civil servants, politicians, and the police services will be brought into the public domain and be robustly challenged via every possible legal and civil remedy.

This must be done responsibly, lawfully, and above all peaceably. By way of necessity, it is vital for 'Lawful Observers' to be aware of current Statute Law in several areas. A clear and concise understanding of the widely accepted law, as it is interpreted today, will aid in the identification and proper evidencing of incidences and offences committed by establishment agencies. Without this ability, it will not be possible to achieve successful prosecutions. Being prepared and well informed, provides the best form of defence if unlawful or disproportionate actions are being taken against the greater public.

If you would like to develop your knowledge on topics mentioned in this article, there are a variety of online courses run by an ex-British Policeman named David

Eden. Dave Eden joined London Metropolitan Police Service in 1982 and retired in the rank of Sergeant with Hertfordshire Constabulary in 2009. Throughout his career, he kept detailed accounts of racism, homophobia, sexism, misconduct, and malfeasance within Police services, and continues to work to try and expose those responsible for these actions today.

Dave Eden has recently released a book called 'Nut and Gut' which in detail exposes these crimes and issues. Dave is also a member of the UK National Union of Journalists and has contributed to multiple national newspaper articles and also heavily influenced the 'Lawful Observers' training package.

If this triggers your interest to develop your knowledge, and/or the Lawful Observer Role appeals to you, you can attend the online sessions, as well as a two-day experiential training course.

**Knowledge is power - our power!
Together we go, Together we grow.**

Dr Robert Verkerk - science, law, the government and the people

Independent Medical Doctors Perspective and Opinions.

PROFESSORS, Medical Consultants, Qualified Doctors, Virologists and Scientists are working hard to bring light to the true mechanism of this pandemic. Their research to date has highlighted some very significant concerns regarding how ineffective masks really are, the reality of PCR testing false positives, and the rushed high risk poorly tested vaccine roll out.

Below is evidence-based information on the key issues with links to websites and videos from reliable sources

<https://www.ukmedfreedom.org/>

Professionals supporting medical choice and informed consent. UK based Medical Alliance.

<https://worlddoctorsalliance.com/>

An independent non-profit alliance of doctors, nurses, healthcare professionals and staff around the world who have united in the wake of the Covid-19 response.

<https://www.anhinternational.org/>

Robert Verkerk BSc MSc DIC PhD FACN Founder, Executive & Scientific Director. For over three decades, Rob Verkerk has developed an intimate relationship with the tightropes that span between science and law, between academia and industry, between government and the people — and not least — between humanity's internal and external environments. He has Masters and Doctorate degrees from Imperial College London, where he also worked as a postdoctoral research fellow for 7 years. In 2002, Dr Verkerk founded the Alliance for Natural Health International (ANH-Intl) and has acted as its executive and scientific director since this time. He has directed legal actions to protect the right to natural health and campaigned against drinking water fluoridation and genetically modified crops. He has also been instrumental in exposing the limitations of classical risk analysis as applied by government authorities to foods and natural health products and he is a recognised pioneer

in the development of novel, scientifically rational risk/benefit analysis approaches. He is also the scientific director of ANH-USA. Dr Verkerk has authored some 60 papers in scientific journals and conference proceedings and contributes regularly to magazines and other popular media. He is an accomplished and inspirational speaker and communicator on a wide range of issues relating to sustainability in healthcare, agriculture, food quality, and related fields. The Alliance for Natural Health's mission is safeguarding and promoting sustainable natural health. ANH believes optimum health for any individual can be better achieved by working with, not against, nature. Their vision is to see a world in which all individuals are able to enjoy their fundamental rights and freedoms to choose natural health as their overriding approach to the management or optimisation of their health and those for whom they care, consistent with the principles of rational science and the just rule of law. There should be no negative or

Dr Robert Verkerk BSc MSc DIC PhD FACN Founder, Executive & Scientific Director

"The data is in: Lockdowns serve no useful purpose and cause catastrophic societal and economic harms. They must never be repeated in this country"

undue interference by governments or corporations in the ability of individuals to exercise these fundamental rights, particularly when such interference involves concealing or misrepresenting relevant information, or seeks to gain power or influence for their own benefit. How the ANH achieves its mission and vision is through engaging in Campaigns, (health) Activism, Research, and Education (C.A.R.E.) across a wide range of fields relating to natural approaches to health and care. They C.A.R.E. deeply about freedom of choice in healthcare, healthy eating & lifestyles, the interpretation and development of evidence, the effects of technology (e.g., genetic modification, electromagnetic fields) on health and the environment, and the use of foods, herbal and other natural products in the management of our health and resilience. The Alliance for Natural Health Organisation accomplishes its mission through a unique application of 'good science' and 'good law'. Sign up to their email list and check out their campaigns and keep yourself up to speed with the latest independent scientific

data and health activism events.

"The data is in: lockdowns serve no useful purpose and cause catastrophic societal and economic harms."

"They must never be repeated in this country." says HartGroup.Org

HART is a group of highly qualified UK doctors, scientists, economists, psychologists, and other academic experts. The Hart Group Mission Statement is as follows..." Our core aim is to widen the scientific debate and to consider all of the available evidence, in order to formulate strategies that benefit everyone in society. Our research has identified a need for public policy to reflect a broader and more balanced approach across a number of key areas, in particular:

- Impact of restrictions across the whole of the healthcare system and on wider society;
- Cost vs benefit of the school, college, and university closures;
- The mental health impact of the restrictive measures;
- Mass-testing procedures and associated data analysis;

- A full assessment of the psychological impact, on individuals and wider society, of COVID-19 communication policies;
- Safe and effective treatment and prevention/prophylaxis options, in addition to vaccination, to increase survival rates.

Consultations from HART will be founded on scientific, evidence-based principles in the interests of public health. We want to encourage clear, calm, and compassionate discussions. Our experts take a collaborative approach and invite contributions from all sectors and interested groups or communities, at all levels. HART is a not-for-profit, unincorporated membership association and its consulting members collaborate on an entirely voluntary basis." Their conclusion is that "The data is in: lockdowns serve no useful purpose and cause catastrophic societal and economic harms. They must never be repeated in this country."

How to build a stronger immune system - Does the Prof know ?

There are some fundamental principles of medicine that should have always been respected.

Some are as follows:

1. **“Do no harm”;**
2. **“Always provide fully informed consent”;** and
3. **If you are asking someone to be part of a trial or medical experiment, rather than offering an established and approved medicine, then you really must have fully informed consent, regarding the realities of this experiment.**

Surely, the best approach and attitude is not to be anti Vaccination – it is much more reasonable to be pro medical freedom of choice. This discrimination though is very important to make and is in fact vital. It is all about freedom. However, by law, any medical choice or decision must be on the basis of fully informed consent and a truly free choice, without any coercion or consequence. So in order to have fully informed consent there needs to be a full spectrum of information available to the public and information must not be censored or biased. Both sides of an argument must rightfully be given equal value and an opportunity for conversation and debate must be created as part of our open democratic society.

In the interests of free speech and informed consent let's look at some facts and bring some much needed breadth to the discussion. Covid viral infections, so we are told, can yield no symptoms, mild symptoms, moderate symptoms, severe symptoms and also fatal symptoms. This clearly is also a disease so severe that you need to be tested to know if you have it or not. We are also told that many of the people who die from (with) Covid have Vitamin D3 deficiency, are often overweight, elderly and have other severe chronic medical conditions. Presumably then, the healthier you and your immune system are, then the less you should be at risk.

So how do we actually cultivate health and generate a strong immune system? Vitamin D3 has certainly

hit the mainstream and is known to be a key factor in immunity. But are there any other factors we should consider? Well, one person who has studied this question is Professor Robert Thomas. He is an experienced UK oncologist and professor of exercise and biological science at Cambridge University. He works with an established nutritional laboratory and he offers a private blood test that measures micro-nutrients which are

So what else is important to our immunity? Well, our gut health and our microbiome must be central, obviously. Our red blood cells delivering oxygen may also be key to our health, so making sure we have enough Iron, B12 and Folic acid is vital too perhaps? Thyroid function is also likely to be fundamental for our circulation, vitality, metabolism and immunity so naturally optimising our thyroid could be another base

media and scientific narrative. The Government has prioritised clean water as its number one provision for providing and supporting health in our nation and communities. Sadly, the second most important provision, on their list, is vaccines. Not clean air or clean natural food or optimal nutritional supplements but vaccines.

But for widespread vaccine administration to be appropriate, truly fully informed consent has

part of the principle of informed consent, necessary for large-scale vaccine “treatment” roll-out.

By definition, it is clearly unsafe to widely distribute an experimental vaccine. A person who takes a vaccine is normally completely healthy and would normally continue to be healthy without the vaccine. So, vaccine safety must be guaranteed. Vaccines are not always safe and can cause harm (www.gov.uk/vaccine-damage-payment). More studies of the Covid vaccines' safety and efficacy must be conducted and published, and more transparency about possible risks provided to the public before people are coerced without proper fully informed consent into perhaps the largest experimental medication programme in our British history.

The other problem is what if the vaccine is not actually a true vaccine and is actually rather a biotech medical device? We are told it is a strand of messenger RNA (mRNA) that is delivered to the workings of our cells and is a mechanism for controlling our cells' protein production to produce synthetic pathogenic virus proteins, designed to elicit an immune response. This is brand-new technology, and has no medium or long-term studies and could so easily go very badly wrong. There cannot realistically be truly informed consent as there is a vast deficiency in the information necessary to qualify as informed consent.

Do we really need a vaccine if we are fit and healthy with a good, functioning immune system as then Covid 19 is unlikely to do us much harm? This is an important consideration. Maybe there are many other much healthier, less risky and less toxic ways of boosting the immune system and dealing with viral infections. Pharmaceutical companies are exempt from all vaccine damage liability which doesn't give much reassurance. So until some of the fundamental guiding principles of medicine have been more consistently upheld; maybe we may wish to wait a while, let things unfold and gather some more information for ourselves before deciding which way we want to go. To trust your immune system or to trust Big Pharma? A difficult decision for many, but the choice must always be our own.

apparently essential and have been implicated in the “cancer pathway” in some way. He seems to be saying that a deficiency of micronutrients can lead to an imbalance in the immunity and this in turn can cause an increase risk of chronic diseases, which according to the Professor may also include cancer. Vitamins, essential minerals, fatty acids and antioxidant enzymes seem to be the key factors and the following are tested as part of his recommended analysis. Zinc, Selenium, Magnesium, Manganese, Copper and Calcium are all tested for. Vitamins A, E, C, D3, and Essential fatty acids (Omega 3) are also checked. The importance of liver detoxification through antioxidant enzymes seems to be another key factor in optimizing immunity apparently.

So, it is clear then - or at least we hope it is - that news from a top Cambridge Professor is that we can indeed influence our immune function through micronutrients optimisation as a principle and in clinical practice. So immunity is the pivot point. Deficiency of building blocks on one side can cause increased risk on the other?

to our health and immunity – does this seem like common sense? A nutritious good healthy diet with optimal amounts of clean water, fresh vegetables, fats and proteins, keeping sugar and refined carbs low and natural nutritional supplements, must surely provide a natural firm foundation wouldn't you think?

We also collectively understand that sunlight, fresh air and being out in nature are so important. Human relationships, physical contact, exercise, good community, family, friends, animals, love and personal intimacy, are also vital to our good health and immune vitality. A good positive attitude is also required. Building health and immunity is both an art and a science and there are a number of key cornerstones that are naturally and self-evidently part of the practicalities of developing better health and immunity.

Why then, are the media and the Government not really listening to Professor Thomas and why are we not all being encouraged to engage in these immune boosting activities? Is the vaccine the only way? It certainly seems like it when we listen to the Government, mainstream

to be a functional reality and we always need to keep asking “Is there another way?”. The Vaccine we are told will not stop you catching Covid, it won't stop you carrying it and it won't stop you passing it on. It may decrease your experience of some of the symptoms, but that is about it, so they say. This means that masks will continue, social distancing will continue, and so will ongoing lockdowns. So in reality is the vaccine actually a symptomatic treatment or is it indeed a true vaccine which confers immunity to the disease? This is yet unclear.

If the vaccine is just a treatment then this begs the question: “are there any other western medical treatment approaches that may also be effective at decreasing symptoms?” Well, certainly Hydroxychloroquine and Ivermectin have hit the news – which are pharmaceutical products, which have been widely used and appear relatively safe. Both have received some serious attention from independent doctors with some very encouraging reports. But again significantly marginalised and not fully discussed by the Government or media, which they should be as
